Question 1

Correct

Mark 1.00 out of 1.00

An interface with no fields or methods is known as a _____

- a. Abstract Interface
- b. CharSequence Interface
- c. Marker Interface
- d. Runnable Interface

Question 2

Correct

Mark 1.00 out of 1.00

Which block is used to handle exceptions?

- a. throw
- b. try
- c. catch
- d. finally

Question 3

Correct

Mark 1.00 out of 1.00

Which class is the parent of all exception classes?

- a. Throwable
- b. Error
- c. RuntimeException
- d. Exception

Question 4

Correct

Mark 1.00 out of 1.00

Which class is used to create mutable strings?

- a. Character
- b. String
- c. StringBuilder ✓
- d. StringConstant

Question 5

Correct

Mark 1.00 out of 1.00

Which class represents immutable strings in Java?

- a. String ✓
- b. CharSequence
- c. StringBuilder
- d. StringBuffer

Question 6

Correct

Mark 1.00 out of 1.00

Which exception occurs when accessing a null object?

- a. ClassNotFoundException
- b. ArithmeticException
- c. IOException
- d. NullPointerException ✓

Question 7

Correct

Mark 1.00 out of 1.00

Which exception occurs when array index is out of range?

- a. ArrayIndexOutOfBoundsExceptio
- b. ArrayException
- c. OutOfBoundsError
- d. IndexException

Question 8

Correct

Mark 1.00 out of 1.00

Which exception occurs when dividing a number by zero?

- a. IOException
- b. ArithmeticException
- c. NumberFormatException
- d. NullPointerException

Question 9

Correct

Mark 1.00 out of 1.00

Which feature makes a class immutable?

- a. Public variables
- b. Protected variables
- c. All fields private and final
- d. Mutable fields

Question 10

Correct

Mark 1.00 out of 1.00

Which keyword declares exceptions that a method may throw?

- a. finally
- b. catch
- c. throw
- d. throws

Question 11

Correct

Mark 1.00 out of 1.00

Which keyword is used to access classes from another package?

- a. package
- b. include
- c. using
- d. import

Question 12

Correct

Mark 1.00 out of 1.00

Which keyword is used to create a subclass exception?

- a. implement
- b. throw
- c. extends
- d. inherit

Question 13

Correct

Mark 1.00 out of 1.00

Which keyword is used to define a method in Java?

- a. return type
- b. define
- c. function
- d. method

Question 14

Correct

Mark 1.00 out of 1.00

Which keyword is used to define a package in Java?

- a. define
- b. import
- c. package
- d. class

Question 15

Correct

Mark 1.00 out of 1.00

Which keyword is used to define an abstract class?

- a. abstract
- b. virtual
- c. final
- d. interface

Question 16

Correct

Mark 1.00 out of 1.00

Which keyword is used to explicitly throw an exception?

- a. throws
- b. try
- c. catch
- d. throw ✓

Question 17

Correct

Mark 1.00 out of 1.00

Which keyword is used to implement an interface?

- a. interface
- b. inherit
- c. implements ✓
- d. extends

Question 18

Correct

Mark 1.00 out of 1.00

Which keyword is used to inherit a class?

- a. extends ✓
- b. import
- c. implement
- d. inherits

Question 19

Correct

Mark 1.00 out of 1.00

Which keyword refers to the current object?

- a. super
- b. this ✓
- c. self
- d. current

Question 20

Correct

Mark 1.00 out of 1.00

Which keyword refers to the parent class object?

- a. super
- b. base
- c. parent
- d. this

Question 21

Correct

Mark 1.00 out of 1.00

Which method is used to find the length of a String?

- a. count()
- b. size()
- c. length()
- d. getLength()

Question 22

Correct

Mark 1.00 out of 1.00

Early binding is also known as?

- a. Late binding
- b. Run time binding
- c. Dynamic binding
- d. Static binding

Question 23

Correct

Mark 1.00 out of 1.00

How can we identify whether a compilation unit is class or interface from a .class file?

- a. The class or interface name should be postfixed with unit type
- b. Java source file header
- c. Extension of compilation unit
- d. We cannot differentiate between class and interface

Question 24

Correct

Mark 1.00 out of 1.00

If a class encapsulates data and methods into a single unit, what is it preventing?

- a. Implementation of interfaces
- b. Direct manipulation of its data ✓
- c. Use of inheritance
- d. Code reusability

Question 25

Correct

Mark 1.00 out of 1.00

In which memory a String is stored, when we create a string using new operator?

- a. String memory
- b. Stack
- c. Heap memory ✓
- d. Random storage space

Question 26

Correct

Mark 1.00 out of 1.00

In which type of inheritance does one class act as a superclass for more than one sub-class?

- a. Hybrid inheritance
- b. Multilevel inheritance
- c. Hierarchical inheritance ✓
- d. Multiple inheritances

Question 27

Correct

Mark 1.00 out of 1.00

Out of these packages, which one contains an abstract keyword?

- a. java.lang ✓
- b. java.util
- c. java.io
- d. java.system

Question 28

Correct

Mark 1.00 out of 1.00

The Coelacanth was considered a cryptid until 1938.

- a. True
- b. False

Question 29

Correct

Mark 1.00 out of 1.00

What is the difference between static and instance variables in Java?

- a. Static variables are shared among all instances of a class, while instance variables have separate values for each instance
- b. Static variables can be accessed without creating an object, while instance variables require an object reference
- c. Static variables are associated with the class itself, while instance variables are associated with an instance of a class
- d. All of mentioned

Question 30

Correct

Mark 1.00 out of 1.00

What is the main role of a getter method?

- a. To remove the attribute's value
- b. To retrieve the value of a private attribute
- c. To update an attribute's value
- d. To create a new attribute

Question 31

Correct

Mark 1.00 out of 1.00

What is the purpose of the "final" keyword in Java?

- a. To prevent overriding of a method
- b. All of mentioned
- c. To prevent modification of a variable's value
- d. To prevent the inheritance of a class

Question 32

Correct

Mark 1.00 out of 1.00

What is the purpose of the "super" keyword in Java?

- a. To invoke the superclass constructor or methods
- b. To refer to the current object
- c. To create multiple instances of a class
- d. To hide data and methods within a class

Question 33

Correct

Mark 1.00 out of 1.00

When an object is created an initialization needs to be done which is automatically done by?

- a. Constructor
- b. Member
- c. Destructor
- d. Friend

Question 34

Correct

Mark 1.00 out of 1.00

When does Overloading not occur?

- a. When more than a single method have the same name, yet different types or number of parameters and different method signature
- b. When more than a single method have the same signature, same name, and the same number of parameters have different types
- c. When more than a single method have the same name, the same signature, but have different numbers of signature
- d. When more than a single method have the same name, the same number and types of parameters, and yet different signatures ✓

Question 35

Correct

Mark 1.00 out of 1.00

Which among the following cannot be used for the concept of polymorphism?

- a. Constructor Overloading
- b. Global member function
- c. Static member function ✓
- d. Member function overloading

Question 36

Correct

Mark 1.00 out of 1.00

Which component is responsible for converting bytecode into machine specific code?

- a. JDK
- b. JVM ✓
- c. JIT
- d. JRE

Question 37

Correct

Mark 1.00 out of 1.00

Which member of the superclass is never accessible to the subclass?

- a. All of the mentioned
- b. Public member
- c. Private member ✓
- d. Protected member

Question 38

Correct

Mark 1.00 out of 1.00

Which of the following class is known as the generic class?

- a. Abstract class
- b. Final class
- c. Template class ✓
- d. Efficient code

Question 39

Correct

Mark 1.00 out of 1.00

Which of the following variable violates the definition of encapsulation?

- a. Public variables
- b. Array variables
- c. Local variables
- d. Global variables ✓

Question 40

Correct

Mark 1.00 out of 1.00

Which one of the following is not a OOPs Pillar?

- a. Inheritance
- b. Polymorphism
- c. Exception ✓
- d. Abstraction
