Question 1

Correct

Mark 1.00 out of 1.00

What is OOP?

Select one:

- a. Only functional programming
- b. Programming using objects and classes
- c. None
- d. Programming without classes

The correct answer is: Programming using objects and classes

Question 2

Correct

Mark 1.00 out of 1.00

Private variables are denoted by:

Select one:

- a. var__
- b. _var
- c. __var
- d. var

The correct answer is: __var

Question 3

Correct

Mark 1.00 out of 1.00

Which is correct encapsulation practice?

Select one:

- a. Global variable
- b. None
- c. Getter/Setter ✓
- d. Direct access

The correct answer is: Getter/Setter

Question 4

Correct

Mark 1.00 out of 1.00

Why use encapsulation?

Select one:

- a. Control
- b. All ✓
- c. Flexibility
- d. Security

The correct answer is: All

Question 5

Correct

Mark 1.00 out of 1.00

Accessing private variable directly gives:

Select one:

- a. Value
- b. None
- c. Warning
- d. Error ✓

The correct answer is: Error

Question 6

Correct

Mark 1.00 out of 1.00

Getter method is used to:

Select one:

- a. Set value
- b. None
- c. Delete value
- d. Get value ✓

The correct answer is: Get value

Question 7

Correct

Mark 1.00 out of 1.00

Setter method is used to:

Select one:

- a. None
- b. Print
- c. Assign ✓
- d. Retrieve

The correct answer is: Assign

Question 8

Correct

Mark 1.00 out of 1.00

Abstraction means:

Select one:

- a. None
- b. Hiding implementation ✓
- c. Showing implementation
- d. Deleting code

The correct answer is: Hiding implementation

Question 9

Correct

Mark 1.00 out of 1.00

Abstract class is created using:

Select one:

- a. os module
- b. math module
- c. sys module
- d. abc module ✓

The correct answer is: abc module

Question 10

Incorrect

Mark 0.00 out of 1.00

Abstract method is defined using:

Select one:

- a. None
- b. @staticmethod
- c. @abstractmethod
- d. @override ✗

The correct answer is: @abstractmethod

Question 11

Correct

Mark 1.00 out of 1.00

Can we create object of abstract class?

Select one:

- a. None
- b. Sometimes
- c. No ✓
- d. Yes

The correct answer is: No

Question 12

Correct

Mark 1.00 out of 1.00

Which is not an OOP concept?

Select one:

- a. Encapsulation
- b. Compilation ✓
- c. Polymorphism
- d. Abstraction

The correct answer is: Compilation

Question 13

Incorrect

Mark 0.00 out of 1.00

Abstract class must contain:

Select one:

- a. Methods
- b. Variables
- c. None ✗
- d. At least one abstract method

The correct answer is: At least one abstract method

Question 14

Correct

Mark 1.00 out of 1.00

Inheritance means:

Select one:

- a. Delete code
- b. None
- c. Hide code
- d. Reuse code ✓

The correct answer is: Reuse code

Question 15

Correct

Mark 1.00 out of 1.00

Types of inheritance in Python:

Select one:

- a. Single
- b. All ✓
- c. Multilevel
- d. Multiple

The correct answer is: All

Question 16

Correct

Mark 1.00 out of 1.00

Parent class is also called:

Select one:

- a. None
- b. Child
- c. Derived
- d. Base ✓

The correct answer is: Base

Question 17

Incorrect

Mark 0.00 out of 1.00

Child class is called:

Select one:

- a. Derived
- b. Parent
- c. Base
- d. None ✗

The correct answer is: Derived

Question 18

Correct

Mark 1.00 out of 1.00

Syntax of inheritance:

Select one:

- a. class(B) A
- b. class A:B
- c. class A(B): ✓
- d. None

The correct answer is: class A(B):

Question 19

Incorrect

Mark 0.00 out of 1.00

Which allows reuse of code?

Select one:

- a. Encapsulation
- b. Polymorphism ✗
- c. None
- d. Inheritance

The correct answer is: Inheritance

Question 20

Correct

Mark 1.00 out of 1.00

Polymorphism means:

Select one:

- a. One form
- b. Many forms ✓
- c. None
- d. No form

The correct answer is: Many forms

Question 21

Correct

Mark 1.00 out of 1.00

Method overriding is:

Select one:

- a. None
- b. Same method different class ✓
- c. Same class
- d. Different method

The correct answer is: Same method different class

Question 22

Correct

Mark 1.00 out of 1.00

Method overloading in Python is:

Select one:

- a. Mandatory
- b. None
- c. Supported directly
- d. Not supported directly ✓

The correct answer is: Not supported directly

Question 23

Correct

Mark 1.00 out of 1.00

Class is a:

Select one:

- a. Variable
- b. Object
- c. Function
- d. Blueprint ✓

The correct answer is: Blueprint

Question 24

Correct

Mark 1.00 out of 1.00

Runtime polymorphism is achieved by:

Select one:

- a. None
- b. Encapsulation
- c. Overloading
- d. Overriding ✓

The correct answer is: Overriding

Question 25

Correct

Mark 1.00 out of 1.00

Which keyword is used for overriding?

Select one:

- a. override
- b. None
- c. extends
- d. No keyword ✓

The correct answer is: No keyword

Question 26

Incorrect

Mark 0.00 out of 1.00

What will happen if child class does not override method?

Select one:

- a. Error ✗
- b. None
- c. Crash
- d. Parent method used

The correct answer is: Parent method used

Question 27

Incorrect

Mark 0.00 out of 1.00

What is `super()` used for?

Select one:

- a. Print object
- b. Delete object
- c. None
- d. Call parent class

The correct answer is: Call parent class

Question 28

Correct

Mark 1.00 out of 1.00

Multiple inheritance means:

Select one:

- a. Many parents
- b. None
- c. One child
- d. One parent

The correct answer is: Many parents

Question 29

Incorrect

Mark 0.00 out of 1.00

Which supports abstraction + inheritance?

Select one:

- a. Abstract class
- b. Function
- c. Class
- d. None

The correct answer is: Abstract class

Question 30

Correct

Mark 1.00 out of 1.00

Data hiding is achieved using:

Select one:

- a. Private ✓
- b. Public
- c. None
- d. Protected

The correct answer is: Private

Question 31

Correct

Mark 1.00 out of 1.00

Which is dynamic binding?

Select one:

- a. Static
- b. Compile time
- c. None
- d. Runtime ✓

The correct answer is: Runtime

Question 32

Correct

Mark 1.00 out of 1.00

Which concept improves security?

Select one:

- a. Encapsulation ✓
- b. Polymorphism
- c. None
- d. Inheritance

The correct answer is: Encapsulation

Question 33

Correct

Mark 1.00 out of 1.00

Which concept reduces redundancy?

Select one:

- a. Inheritance ✓
- b. Encapsulation
- c. None
- d. Abstraction

The correct answer is: Inheritance

Question 34

Correct

Mark 1.00 out of 1.00

Object is:

Select one:

- a. Loop
- b. Function
- c. Instance of class ✓
- d. Variable

The correct answer is: Instance of class

Question 35

Correct

Mark 1.00 out of 1.00

Which is correct OOP flow?

Select one:

- a. Function → Class
- b. None
- c. Class → Object ✓
- d. Object → Class

The correct answer is: Class → Object

Question 36

Correct

Mark 1.00 out of 1.00

Which keyword is used to define a class?

Select one:

- a. struct
- b. class ✓
- c. def
- d. function

The correct answer is: class

Question 37

Correct

Mark 1.00 out of 1.00

What is `self`?

Select one:

- a. Function
- b. Object reference ✓
- c. Variable
- d. Keyword

The correct answer is: Object reference

Question 38

Correct

Mark 1.00 out of 1.00

Can we replace `self`?

Select one:

- a. Only this
- b. None
- c. Yes (any name) ✓
- d. No

The correct answer is: Yes (any name)

Question 39

Correct

Mark 1.00 out of 1.00

Constructor is called when:

Select one:

- a. Program ends
- b. Class created
- c. Object created
- d. Function called

The correct answer is: Object created

Question 40

Incorrect

Mark 0.00 out of 1.00

Encapsulation means:

Select one:

- a. None
- b. Showing data
- c. Deleting data
- d. Hiding data

The correct answer is: Hiding data
