Status	Finished
Started	Thursday, 26 March 2026, 6:36 PM
Completed	Thursday, 26 March 2026, 6:43 PM
Duration	7 mins 15 secs
Grade	**39.00** out of 40.00 (**97.5**%)

Question 1

Correct

Mark 1.00 out of 1.00

Which of the following is not a common goal of AI?

Select one:

- a. Understanding intelligence
- b. Replacing all forms of science
- c. Mimicking human decision-making
- d. Building smart systems

Correct answer: Replacing all forms of science

The correct answer is: Replacing all forms of science

Question 2

Correct

Mark 1.00 out of 1.00

The basic structure of an AI system generally includes:

Select one:

- a. Only keyboard and mouse
- b. Wires and plugs only
- c. Printer and monitor only
- d. Input, processing/model, and output

Correct answer: Input, processing/model, and output

The correct answer is: Input, processing/model, and output

Question 3

Correct

Mark 1.00 out of 1.00

Modern AI growth is mainly due to:

Select one:

- a. Removal of computers
- b. Slower processors
- c. Big data and better algorithms ✓
- d. Less data

Correct answer: Big data and better algorithms

The correct answer is: Big data and better algorithms

Question 4

Correct

Mark 1.00 out of 1.00

Which of the following is a key concern in AI ethics?

Select one:

- a. Bias in decision-making
- b. Privacy
- c. All of the above ✓
- d. Fairness

Correct answer: All of the above

The correct answer is: All of the above

Question 5

Correct

Mark 1.00 out of 1.00

An AI-based hiring tool rejects applicants from a particular group unfairly because of biased training data. Which issue does this represent?

Select one:

- a. Search optimization
- b. Fairness and bias in AI ethics
- c. Turing Machine limitation
- d. Responsible AI

Correct answer: Fairness and bias in AI ethics

The correct answer is: Fairness and bias in AI ethics

Question 6

Correct

Mark 1.00 out of 1.00

AI systems should protect personal information through:

Select one:

- a. Public release of all data
- b. Unlimited data sharing
- c. Ignoring user consent
- d. Privacy safeguards

Correct answer: Privacy safeguards

The correct answer is: Privacy safeguards

Question 7

Correct

Mark 1.00 out of 1.00

Which of the following is the best definition of AI?

Select one:

- a. A method of making machines perform tasks requiring human intelligence
- b. A branch of biology
- c. A process of internet browsing
- d. A type of computer hardware

Correct answer: A method of making machines perform tasks requiring human intelligence

The correct answer is: A method of making machines perform tasks requiring human intelligence

Question 8

Correct

Mark 1.00 out of 1.00

AI ethics refers to:

Select one:

- a. Rules for building larger computers
- b. Faster programming methods
- c. Hardware recycling
- d. Moral principles guiding AI development and use

Correct answer: Moral principles guiding AI development and use

The correct answer is: Moral principles guiding AI development and use

Question 9

Correct

Mark 1.00 out of 1.00

The tape in a Turing Machine is used to:

Select one:

- a. Store and manipulate symbols ✓
- b. Charge the machine
- c. Print photos
- d. Connect to the internet

Correct answer: Store and manipulate symbols

The correct answer is: Store and manipulate symbols

Question 10

Correct

Mark 1.00 out of 1.00

A school uses AI to recommend study materials based on each student's performance. This is an example of:

Select one:

- a. Hardware maintenance
- b. Data deletion
- c. Manual evaluation only
- d. Personalized learning ✓

Correct answer: Personalized learning

The correct answer is: Personalized learning

Question 11

Correct

Mark 1.00 out of 1.00

Alan Turing is widely known as:

Select one:

- a. Creator of social media
- b. Father of Artificial Intelligence and modern computing foundations ✓
- c. Inventor of television
- d. Founder of cloud storage

Correct answer: Father of Artificial Intelligence and modern computing foundations

The correct answer is: Father of Artificial Intelligence and modern computing foundations

Question 12

Correct

Mark 1.00 out of 1.00

The Turing Test is also called:

Select one:

- a. Binary test
- b. Logic test
- c. Mechanical test
- d. Imitation game ✓

Correct answer: Imitation game

The correct answer is: Imitation game

Question 13

Correct

Mark 1.00 out of 1.00

AI is commonly used in:

Select one:

- a. Chatbots
- b. Recommendation systems
- c. Self-driving vehicles
- d. All of the above ✓

Correct answer: All of the above

The correct answer is: All of the above

Question 14

Correct

Mark 1.00 out of 1.00

Which of the following is a possible negative implication of AI?

Select one:

- a. Job displacement
- b. Privacy invasion
- c. All of the above ✓
- d. Algorithmic bias

Correct answer: All of the above

The correct answer is: All of the above

Question 15

Correct

Mark 1.00 out of 1.00

Artificial Intelligence mainly deals with creating machines that can:

Select one:

- a. Think and act intelligently ✓
- b. Replace electricity
- c. Only store data
- d. Only perform calculations

Correct answer: Think and act intelligently

The correct answer is: Think and act intelligently

Question 16

Correct

Mark 1.00 out of 1.00

In an AI system, data is mainly used to:

Select one:

- a. Replace the processor
- b. Decorate the interface
- c. Eliminate algorithms
- d. Train or guide the system ✓

Correct answer: Train or guide the system

The correct answer is: Train or guide the system

Question 17

Correct

Mark 1.00 out of 1.00

Responsible AI means AI systems should be:

Select one:

- a. Fair, transparent, and accountable ✓
- b. Hidden from users
- c. Built without testing
- d. Used without any rules

Correct answer: Fair, transparent, and accountable

The correct answer is: Fair, transparent, and accountable

Question 18

Correct

Mark 1.00 out of 1.00

The Turing Machine is important because it helps explain:

Select one:

- a. Circuit repair
- b. Internet browsing
- c. Weather forecasting
- d. The limits of computation ✓

Correct answer: The limits of computation

The correct answer is: The limits of computation

Question 19

Correct

Mark 1.00 out of 1.00

A company uses an AI chatbot to answer customer questions 24/7. This example best shows that AI can:

Select one:

- a. Eliminate the internet
- b. Only solve mathematical problems
- c. Automate human-like communication tasks ✓
- d. Work only in factories

Correct answer: Automate human-like communication tasks

The correct answer is: Automate human-like communication tasks

Question 20

Correct

Mark 1.00 out of 1.00

Which legal issue is often associated with AI?

Select one:

- a. All of the above ✓
- b. Liability for errors
- c. Data protection
- d. Intellectual property

Correct answer: All of the above

The correct answer is: All of the above

Question 21

Correct

Mark 1.00 out of 1.00

The AI revolution refers to:

Select one:

- a. A war between computers
- b. The end of science
- c. A hardware-only upgrade
- d. The growing transformation of society and industries through intelligent systems

Correct answer: The growing transformation of society and industries through intelligent systems

The correct answer is: The growing transformation of society and industries through intelligent systems

Question 22

Correct

Mark 1.00 out of 1.00

"Being human in the age of AI" mainly concerns:

Select one:

- a. Electrical circuits only
- b. File storage systems
- c. Building wooden robots
- d. Human identity, creativity, and decision-making in a world with intelligent machines

Correct answer: Human identity, creativity, and decision-making in a world with intelligent machines

The correct answer is: Human identity, creativity, and decision-making in a world with intelligent machines

Question 23

Correct

Mark 1.00 out of 1.00

The Turing Test mainly evaluates:

Select one:

- a. Screen resolution
- b. Battery performance
- c. Conversational intelligence ✓
- d. Physical strength

Correct answer: Conversational intelligence

The correct answer is: Conversational intelligence

Question 24

Correct

Mark 1.00 out of 1.00

Which of the following best describes AI evolution?

Select one:

- a. It ended after the 1990s
- b. It moved from simple logic-based models to data-driven learning systems ✓
- c. It is used only in laboratories
- d. It has remained unchanged

Correct answer: It moved from simple logic-based models to data-driven learning systems

The correct answer is: It moved from simple logic-based models to data-driven learning systems

Question 25

Correct

Mark 1.00 out of 1.00

Alan Turing proposed a famous test to determine whether a machine can:

Select one:

- a. Repair itself physically
- b. Use electricity efficiently
- c. Run faster than humans
- d. Behave intelligently like a human ✓

Correct answer: Behave intelligently like a human

The correct answer is: Behave intelligently like a human

Question 26

Correct

Mark 1.00 out of 1.00

The Dartmouth Conference is important because it:

Select one:

- a. Created the first robot
- b. Marked the birth of AI as a field ✓
- c. Invented the internet
- d. Developed cloud computing

Correct answer: Marked the birth of AI as a field

The correct answer is: Marked the birth of AI as a field

Question 27

Correct

Mark 1.00 out of 1.00

A Turing Machine is:

Select one:

- a. A theoretical model of computation ✓
- b. A machine learning library
- c. A real robot used in factories
- d. A search engine

Correct answer: A theoretical model of computation

The correct answer is: A theoretical model of computation

Question 28

Correct

Mark 1.00 out of 1.00

Which of the following is a major milestone in AI history?

Select one:

- a. Discovery of gravity
- b. Invention of radio
- c. Deep Blue defeating Garry Kasparov ✓
- d. Introduction of television

Correct answer: Deep Blue defeating Garry Kasparov

The correct answer is: Deep Blue defeating Garry Kasparov

Question 29

Correct

Mark 1.00 out of 1.00

Transparency in AI means:

Select one:

- a. The AI should use glass screens
- b. The AI should avoid data
- c. The working and decisions of AI should be understandable ✓
- d. The system should be physically transparent

Correct answer: The working and decisions of AI should be understandable

The correct answer is: The working and decisions of AI should be understandable

Question 30

Correct

Mark 1.00 out of 1.00

Which of these devices most commonly uses AI?

Select one:

- a. Smart speaker ✓
- b. Wooden chair
- c. Pen drive
- d. Printed book

Correct answer: Smart speaker

The correct answer is: Smart speaker

Question 31

Correct

Mark 1.00 out of 1.00

AI systems can be designed to:

Select one:

- a. Make decisions
- b. Perceive environment
- c. Process information
- d. All of the above ✓

Correct answer: All of the above

The correct answer is: All of the above

Question 32

Correct

Mark 1.00 out of 1.00

Which of the following is an example of unethical AI use?

Select one:

- a. Medical image analysis with consent
- b. Spell checking
- c. Traffic prediction
- d. Biased hiring software ✓

Correct answer: Biased hiring software

The correct answer is: Biased hiring software

Question 33

Correct

Mark 1.00 out of 1.00

The scope of AI includes:

Select one:

- a. Reasoning
- b. All of the above ✓
- c. Learning
- d. Problem solving

Correct answer: All of the above

The correct answer is: All of the above

Question 34

Incorrect

Mark 0.00 out of 1.00

Which period is known for reduced funding and interest in AI?

Select one:

- a. AI Network Age ✗
- b. AI Winter
- c. AI Boom
- d. AI Spring

Correct answer: AI Winter

The correct answer is: AI Winter

Question 35

Correct

Mark 1.00 out of 1.00

Accountability in AI means:

Select one:

- a. Only machines are responsible
- b. AI cannot make mistakes
- c. Humans and organizations must take responsibility for AI actions ✓
- d. No one is responsible for AI outcomes

Correct answer: Humans and organizations must take responsibility for AI actions

The correct answer is: Humans and organizations must take responsibility for AI actions

Question 36

Correct

Mark 1.00 out of 1.00

A smart traffic system changes signal timings based on real-time vehicle movement. This shows AI being used for:

Select one:

- a. Replacing roads
- b. Real-world decision-making and automation ✓
- c. Legal documentation
- d. Entertainment only

Correct answer: Real-world decision-making and automation

The correct answer is: Real-world decision-making and automation

Question 37

Correct

Mark 1.00 out of 1.00

Human oversight in AI is important because:

Select one:

- a. Humans are slower
- b. AI systems can make harmful or incorrect decisions
- c. AI never needs supervision
- d. Machines have legal rights equal to judges

Correct answer: AI systems can make harmful or incorrect decisions

The correct answer is: AI systems can make harmful or incorrect decisions

Question 38

Correct

Mark 1.00 out of 1.00

Which principle helps ensure AI does not discriminate unfairly?

Select one:

- a. Compression
- b. Speed
- c. Randomization
- d. Fairness

Correct answer: Fairness

The correct answer is: Fairness

Question 39

Correct

Mark 1.00 out of 1.00

A hospital uses an AI system to identify diseases from X-ray images. What is the main benefit of AI in this case?

Select one:

- a. Avoiding the use of patient data completely
- b. Assisting doctors in faster and more accurate diagnosis ✓
- c. Replacing all doctors permanently
- d. Removing the need for medical knowledge

Correct answer: Assisting doctors in faster and more accurate diagnosis

The correct answer is: Assisting doctors in faster and more accurate diagnosis

Question 40

Correct

Mark 1.00 out of 1.00

Which branch of computer science is closely related to AI?

Select one:

- a. Word processing
- b. Networking only
- c. Machine Learning ✓
- d. Graphic design

Correct answer: Machine Learning

The correct answer is: Machine Learning
