BIG DATA QUIZ – 1

1. Which of the following is **not** in the V's of big data?

- A) Volume
- B) Vocalocity
- C) Velocity
- D) Veracity

2. Which of the following is an example of NoSQL?

- A) PostgreSQL
- B) Oracle
- C) MySQL
- D) MongoDB

3. SQL commands are mainly categorized into _____ categories.

- 4
- 5
- 6
- 7

4. Which of the following statements is incorrect about NoSQL Databases?

- No declarative query language
- Stands for NOt SQL
- Designed for Horizontal scaling
- Gives high performance, high availability

5. Which technology is commonly used for storing and processing bigdata?

- Relational database
- Nosql database
- Flat-file database
- XML database

6. NoSQL is not suitable for which of the following requirements? I - ACID transactions II - Need high consistency III - Multiple relations IV - Horizontal scaling

- I, III
- I, IV
- II, III, IV
- I, II, III

BIG DATA QUIZ – 2

1. Which is not one of the V's of Big Data?

- Variety
- Velocity
- Volatile
- Volume

2. What is one of the main characteristics of Big Data processing?

- Centralized storage of data in a Data Warehouse
- Centralized data processing
- Distributed collection and computing of data
- Collection of information through highly optimized computer systems

3. _____ means dividing data in logical parts to improve performance.

- Normalizing
- Partitioning
- Scrubbing
- Extracting

4. HDFS stands for _____.

- Hive Distributed File System
- Hadoop Distributed File System
- Hadoop Direct File System
- Hive de-normalized File System

5. Identify the correct option which defines Data Mart?

- part of data warehouse
- another type of data warehouse
- not related to data warehouse
- type of data lake

6. _____ is Processing finite set of data.

- Stream processing
- String processing
- Batch processing
- Bash processing

7. _____ in data warehouse is the process of adding relevant data from external sources.

- Conditioning
- Scrubbing
- Enrichment
- Partitioning

8. Which of the following are incorrect Big Data Technologies?

- Hadoop
- Spark
- Hive
- Cron

9. What format of data can be stored in a data lake?

- Structured, Unstructured and Semi-Structured data
- Only Structured data
- Only Unstructured and Semi-Structured data
- Only Unstructured data

10. Which of the programming languages is not used for big data processing?

- Java
- Scala
- Python
- Visual Basic

BIG QUIZ – 3

1. Data in _____ bytes size is called Big Data.

- Mega
- Giga
- Peta
- Meta

2. Which of the following is not Big Data Technologies?

- Apache Hadoop
- Apache Spark
- Apache Kafka
- Apache Pytorch

3. A _____ is a centralized repository designed to store, process, and secure large amounts of structured, semi structured, and unstructured data.

- data lake
- data lands
- data ponds
- databricks

4. JSON format data is comes under _____ data.

- structured
- semi-structured
- wide-structured
- unstructured

5. Which of the following is not a characteristics of big data?

- Volume
- Virtuality
- Velocity
- Variety

6. _____ Database is a non-relational Data Management System, that does not require a fixed schema.

- mySQL
- OnSQL
- NowSQL
- NoSQL

7. _____ is the process of coordinating many jobs to run as quickly and efficiently as possible on a scheduled cadence.

- Data mining
- Orchestration
- Data Architecture
- Data Management

8. Which of the following are not the Types of data in big-data?

- Structured
- unstructured
- Semi-structured
- primary data

9. Which of the programming language is not used for big data processing?

- Python
- Java
- C++
- Mongo

10. OLTP stand for?

- online transfer processing
- offline transaction processing
- online transaction processing
- offline transformation processing

11. In Data warehouse _____ tables are the tables used to store data attributes.

- Fact
- Dimension
- Matrix
- Array

1.

Which of the following is the characteristics of big data?

A. Varrancity
B. Virtuality
C. Variety
D. Verbify

Answer: C

2.

which of the following is not a categories of SQL commands ?

A. DDL
B. DQL
C. DTL
D. DCL

Answer: C

3.

_____ is a transactional pattern commonly used in programming and represents the four basic operations of persistent storage in a database.

A. ACID
B. CUAD
C. CRUD
D. REST

Answer: C

4.

Which of the following are not the Types of data in big-data ?

A. Structured
B. unstructured
C. Semi-structured
D. primary data

Answer: D

5.

Which of the following is not a characteristics of big data?

A. Volume
B. Virtuality
C. Velocity
D. Variety

Answer: B

SunBeam

1.

ELT stands for

A. extract, load, and transfer
B. extract, load, and transform
C. effect , load and transfer
D. effect , load and transform

Answer: B

2.

Which of the following is not example of NoSQL?

A. cassendra
B. mongoDB
C. Redis
D. MySQL

Answer: D

3.

In Data warehouse _____ tables are tables used to store data attributes.

A. Fact
B. Dimension
C. Matrix
D. Array

Answer: B

SunBeam

4.

JSON format data is comes under _____ data.

A. structured
B. semi-structured
C. wide-structured
D. unstructured

Answer: B

5.

_____ Database is a non-relational Data Management System, that does not require a fixed schema.

A. mySQL
B. OnSQL
C. NowSQL
D. NoSQL

Answer: D

SunBeam

1.

Which of the following are incorrect Big Data Technologies?

A. Apache Hadoop
B. Apache Spark
C. Apache Kafka
D. Apache PytarchX

Answer: D

2.

Data in _____ bytes size is called Big Data.

A. Tera
B. Giga
C. Peta
D. Meta

Answer: C

3.

Which of the following is not a part of data engineering lifecycle?

A. Storage
B. Building
C. Transformation
D. Ingestion

Answer: B

SunBeam

4.

Which of the following is not characteristics of data systems?

A. Scalability
B. Elasticity
C. Probability
D. Availability

Answer: C

5.

Which of the following is true about big data?

I - Big data refers to data sets that are at least of petabyte in size is true.

II - Big data can be processed using traditional techniques.

III - Big data working only in case of low velocity.

IV - Variety is not a characteristics of big data.

A. I
B. I,II
C. II,Iv
D. II,III

Answer: A

1.

ROLLBACK is _____ type command.

A. DCL
B. TCL
C. DDL
D. DDD

Answer: B

2.

_____ command is used to delete table.

A. FREE
B. DELEET
C. DROP
D. RELISED

Answer: C

3.

Which one is not in v's of Big Data?

A. Variety
B. Velocity
C. Volatile
D. Volume

Answer: C

SunBeam

4.

Veracity in Big data means _____.

A. The data is generated with high speed
B. The data is huge
C. The data is reliable and trustworthy
D. The data management

Answer: C

5.

In RDBMS data is stored in _____.

A. document
B. tables
C. collection
D. keys

Answer: B

6.

_____ introduced the NoSQL concept in 1998.

A. Cassandra
B. Devid Sam
C. Carlo Strozzi
D. E.F. CODD

Answer: C

SunBeam

7.

Which of the following is the full form of RDBMS?

A. Regional Data Management System
B. Relative Database Management System
C. Relational Data Management System
D. Relational Database Management System

Answer: D

SunBeam

1.

Which of the following is not the type of NoSQL?

A. Graph
B. Document
C. Text
D. Search

Answer: C

2.

Which of the following is the type of NoSQL?

A. Row
B. Column
C. Collection
D. Table

Answer: B

3.

Which of the following is not the valid Data warehouse schema?

A. Star
B. Showfall
C. Showflake
D. Galaxy

Answer: B

SunBeam

4.

Which of the following is working on real time data?

A. OLAP
B. OLTP
C. OLPP
D. OTLP

Answer: B

5.

Analytical queries are performed in _____.

A. OLAP
B. OLTP
C. OLPP
D. OTLP

Answer: A

6.

In data engg life cycle pulling data is called known as _____ data.

A. Poping
B. Ingesting
C. Serving
D. Analysing

Answer: B

SunBeam

7.

OLAP stands for

A. Online analytical processing
B. Online analysis processing
C. Online aggregate processing
D. Online analyzing processing

Answer: A

SunBeam

1.

Which of the following is used for live data Processing?

A. Batch
B. Stream
C. Unit
D. Query

Answer: B

2.

In Cloud computing _____ type of Virtualization is used.

A. Type I
B. Type II
C. Type A
D. Type B

Answer: A

3.

PaaS stands for _____.

A. Python as-a Service
B. Platform as-a Service
C. Program as-a Service
D. Process as-a Service

Answer: B

SunBeam

4.

Which of the programming language is not used for big data processing?

A. Python
B. Java
C. Scala
D. mongo

Answer: D

5.

Which of the following are incorrect Big Data Technologies?

A. Hadoop
B. Spark
C. Hive
D. SplunkLine

Answer: D

6.

Apache Spark is maintained by _____ company.

A. DataHits
B. DataSparks
C. DataBricks
D. SparkInc

Answer: C

SunBeam

7.

Hive is Developed by _____ company.

A. DataBricks

B. Yahoo

C. Google

D. Facebook

Answer: D

SunBeam
